

Certified Survey Map Information Sheet

When does this process apply?

The Certified Survey Map process applies when a land division will result in the creation of four (4) or less lots over a period of five (5) years and when such lots are less than 40 acres. This includes extraterritorial land divisions within 1 ½ miles of the Village of Poynette boundaries. These powers are provided to the Village from the State of Wisconsin.

The checklist is provided to assist applicants with proceeding through the process as identified under Title III Chapter 1.04(5) of the Village of Poynette Ordinances.

Survey Process and Registered Land Surveyor

Applicants shall utilize the services of a Registered Land Surveyor to complete the certified survey map. The map shall meet the technical requirements as outlined in Village Ordinance Title III Chapter 1 and Wisconsin State Statutes 236.34.

Administrative Review

Village staff and consultants review the submitted materials and prepare reports to the Plan Commission to review. These reports are utilized to assist in ensuring the certified survey map is in conformance with all applicable rules and regulations and the Village Comprehensive Plan.

Plan Commission Review

The Plan Commission will review the submitted materials. If the CSM does not include a public land dedication, is within the Village's extraterritorial jurisdiction or both the Plan Commission is the only required body to review and take action on the application.

Village Board Action (if necessary)

If the CSM includes a public land dedication and is within the Village, the Plan Commission will make a recommendation to the Village Board, which will take final action on the application.

Other Requirements

Certified Survey Maps shall conform, when applicable, to the following sections of the Village's Land Division ordinance, Title III Chapter 1:

- 1.05: Required Improvements (does not apply to extraterritorial land divisions and subdivisions)
- 1.06: Design Standards
- 1.07: Dedication Requirements

Extraterritorial Information Sheet

I live in the Town of Dekorra/Town of Arlington/Town of Lowville, why do I have to do this?

Under Wisconsin State Statutes cities and villages are granted special powers that authorize them to exercise what's called "extraterritorial jurisdiction." Any land divisions, subdivisions, plats, or similarly named processes that take place within 1 ½ miles of the Village's boundaries shall go before the Village of Poynette's Plan Commission for review and approval.

What benefit does that serve?

Your land's proximity to the Village may bring cause to annex to the Village in the future or will perpetually affect other nearby Village property and residents. The purpose of this process is to effectuate good planning practices and decision making so as to ensure future generations do not have to deal with problems arising from incompatible uses; challenges servicing properties with utilities; and other land development issues that could have been prevented when this action takes place.

Why do I have to pay consultant fees?

A survey is a highly regulated and technical legal document. The Village utilizes qualified, professional planning and engineering consultants to review your application materials. This ensures that you, as the applicant, are protected by having your documents reviewed for accuracy. This review also protects the Village's interests by ensuring all rules and regulations are being followed.

Ultimately, you are initiating a process that provides you a benefit in some way. Rather than pass consulting fees onto Village taxpayers the applicant is required to reimburse for these costs.

What if I don't pay the consultant fees?

As a local government the Village has the ability to engage with the State of Wisconsin on charging unpaid debts to an individual at the time they file their income taxes.

Certified Survey Map Review Checklist

This document is published to provide supplemental information to applicants. Applicants should reference Title III Chapter 1 of the Poynette Village Code for a full description of requirements.

STEPS PRIOR TO SUBMITTING APPLICATION MATERIALS – NO FEE

<u>Step</u>	<u>Completed</u>
Pre-Application Consultation with Village Staff (optional)	
Pre-Application Consultation with Plan Commission (optional)	

MATERIALS REQUIRED PRIOR TO PLACEMENT ON AGENDA

<u>Document</u>	<u>Received</u>	<u>Waived</u>
Certified Survey Map Application Form		
Certified Survey Map Document		
Environmental Assessment (unless waived by Plan Commission)		
Supplemental Materials (unless waived by Village Engineer or not applicable)		
Certified Abstract of Title or similar document		
Final Public Improvement Plans		
Final Grading Plan		
Restrictive Covenants and Easement Agreements		
Property Owners Association documents		
Erosion Control and Stormwater Management Plans		
Certificates required by Wis. Stats. 236.21		
Fees (\$200 + \$20/lot + reimbursable costs)		
Escrows (125% of estimated costs to completion, if required)		
Digital PDF Copy of All Materials

Summary of Proposed Project (add additional sheets, if necessary): _____

Environmental Assessment

The information sought will assist the Plan Commission and Village Board in determining the suitability of the land for development as required by Title III Section 1.03(5) and 1.09(2) and to assess the potential threat to existing flora under Section 1.03(6) of this Chapter. All "yes" answers must be explained in detail by attaching maps and supporting documents describing the impact of the proposed development, which are necessary for the Preliminary Plat or Certified Survey Map to be considered complete.

1. Land Resources	<u>Yes</u>	<u>No</u>
Does the project site involve:		
a. Changes in relief and drainage patterns (attach a topographic map showing, at a minimum, two foot contour intervals).	_____	_____
b. A landform or topographic feature of local or regional interest	_____	_____
c. A flood plain (if yes, attach two copies of a typical stream valley cross-section showing the channel of the stream, the 100 year flood-plains limits (if officially adopted), of each side of the channel and a cross-section of area to be developed).	_____	_____
d. An area of soil instability -- greater than 20% slope and/or organic soils, peats, or mucks at or near the surface.	_____	_____
e. An area of bedrock within 6 feet of the soil surface.	_____	_____
f. An area with the groundwater table within 10 feet of the soil surface.	_____	_____
g. An area with fractured bedrock within 10 feet of the soil surface.	_____	_____

Environmental Assessment

Yes

No

h. A drainageway for 50 or more acres of land.

2. Water Resources

Does the proposed project have:

a. Location within an area traversed by a navigable stream or dry run.

b. Greater than 10% change in the capacity of a storm water storage facility or flow of a waterway within one mile.

c. The use of septic tank-soil absorption fields for on-site waste disposal.

d. Lowering of water table by pumping or drainage.

e. Raising of water table by altered drainage patterns.

3. Biological Resources

Does the project site involve:

a. Critical habitat for plants and animals of community interest.

b. Endangered, unusual or rare species of:

1) Land animals

2) Birds

Environmental Assessment

3) Plants _____

Yes **No**

c. Existing trees and shrubs of greater than 3" diameter at breast height _____

d. Removal or potential damage to over 10% of the present trees, shrubs, vines, grasses and other non-noxious plants. _____

4. Human and Scientific Interest

Does the project site involve:

a. An area of archaeological interest _____

b. An area of geological interest _____

c. An area of hydrological interest _____

d. An area of historical interest _____

1) Historic building or monuments _____

2) Building or monuments of unique architecture _____

e. An area of planned park and recreational use _____

f. An area of soil or water contamination _____

g. Current or past underground storage tanks _____

5. Energy, Transportation and Communications

a. Does the development increase the traffic flow in any collector street by more than 10% _____

Environmental Assessment

	<u>Yes</u>	<u>No</u>
b. Is the development traversed by an existing or planned utility corridor? (gas, electricity, water, sewer, interceptor, communications, storm sewer)	_____	_____
6. Population		
a. Does the development increase by more than 10% the school population of any school serving the development?	_____	_____

Comments on any of the above which may have a significant environmental impact.

Appendices and Supporting Material, including in all cases the Columbia County Soil Survey Map for the project site as prepared by the United States Department of Agriculture, Soil Conservation Service.

*** End of Environmental Assessment ***

Expectations and Tips: Reimbursement for Village Development Review

ATTENTION READ CAREFULLY

Development review processes often require the use of Village consultants, such as planning, engineering and legal consultants. Because it is the applicant who is generating the need for the service, the Village’s policy is to assign consultant costs to the applicant, as opposed to asking general taxpayers to cover these costs. This policy also helps maintain a relatively small permanent Village staff. Applicants are asked on the “Signature of Understanding” page to acknowledge that costs for development review services will be billed back to them for reimbursement. Unpaid costs by the applicant will be applied to the property tax bill or intercepted through the State’s income tax process.

The development review costs provided below represent the *estimated* range of costs associated with each particular type of development review. This usually involves analysis and preparation of a written recommendation to a Village committee, Board, or staff. Costs vary depending on a range of factors, including the type of application, completeness and clarity of the development application, complexity of the proposed development, degree of cooperation from the applicant, and level of community interest.

Type of Development Review Being Requested	Typical Consultant Review Costs
Land Division	
Certified Survey Map	\$100-400
Preliminary Subdivision Plat	\$1,500 to \$2,500
Final Plat (does not include any development agreement time)	\$500 to \$1,200
Condominium Plat	\$1,500 to \$2,500
Rezoning	
To a standard (not Planned Neighborhood) zoning district	\$400 to \$2,000
To PN zoning district, including General Development Plan	\$2,000 to \$5,000
Text Amendment	\$100-\$500
Conditional Use	\$100 to \$500
Sign Permit	\$0 - \$50
Site Plan	\$100 to \$500
Variance	\$100 - \$1,000
Zoning Interpretations	\$100 - \$500
Annexation	\$500 - \$1,000
Vacate Village Land/Right of Way	\$300 - \$1,000

Expectations and Tips: Reimbursement for Village Development Review

Applicants for Village development approvals can help manage and minimize their development review costs and often speed up development review by following these tips:

- 1. Talk or meet with Village Zoning Administrator before submitting an application.** Before you make significant investments in your project, the Administrator can help you understand the feasibility of your proposal, what Village plans and ordinances will apply, the type of review process there will be, and how to prepare a complete application.
- 2. Submit a complete and thorough application.** One of the most important things you can do to make your review process less costly to you is to submit a complete, thorough, and well-organized application in accordance with Village ordinance requirements. There are checklists built into development approval applications to help you make sure your application is complete. To help you prepare an application that has the right level of detail and information, assume that the people reviewing the application have never seen your property before, have no prior understanding of what you are proposing, and don't necessarily understand the reasons for your request.
- 3. Consider working with an experienced professional to help prepare your plans.** Professional engineers, land planners, architects, surveyors and landscape architects should be familiar with standard development review processes and expectations. They are also generally capable of preparing high-quality plans that will ultimately require less time (i.e., less cost for you) for the Village's consultants to review, saving you money in the long run. Any project that includes site grading, stormwater management, or utility work; significant landscaping; or building remodeling or expansion generally requires professionals. For less complicated proposals, it is acceptable to prepare plans yourself rather than paying to have them prepared by a professional. However, keep in mind that even though the project may be less complex, the Village's staff and planning consultant still need to ensure that your proposal meets all requirements. All plans must be prepared with attention to detail.
- 4. For more complex projects, submit your project for conceptual review.** Conceptual review of preliminary plans almost always saves time, money, stress, and frustration in the long run for everyone involved. Conceptual plans may be submitted to the Zoning Administrator, who may share with the planning consultant for a quick, informal review. This will allow you to gauge initial reactions to your proposal and help identify key issues.
- 5. Hold a neighborhood meeting for larger and potentially more controversial projects.** For these types of projects, one way to help the formal development review process go more smoothly is to host a meeting for the neighbors. This usually should happen before you even submit a formal development review application. A neighborhood meeting will give you an opportunity to describe your proposal, respond to questions, and address issues in an environment that is less formal and potentially less emotional than a Plan Commission or Village Board meeting. Please notify Zoning Administrator of your neighborhood meeting date, time, and place; make sure all neighbors are fully aware; and document the outcomes of the meeting to include with your application.

Signature of Understanding

APPLICATION WILL NOT BE CONSIDERED COMPLETE UNTIL THIS PAGE IS SIGNED.

By signing and dating below, I/We:

1. Reviewed and understand the applicable Village of Poynette ordinances and its standards of approval related to this application;
2. Read, understand, and accept my/our responsibilities under the reimbursement section above;
3. Submitted an application that is true, correct, and complete to the best of my/our knowledge;
4. Acknowledge that Village officials and/or employees may, in the performance of their functions, enter upon the subject property to inspect or gather information necessary to process this application;
5. Understand that all meeting dates are tentative and may be postponed by the Village for the reason of incomplete submittals or other administrative reasons;
6. If this application is approved, agree to abide by this application, approved plans, and required conditions associated with plan approval in the development of the subject property; and
7. Understand that the Village's ordinances and/or the conditions of development approval may specify timeframes within which I/we must take certain actions related to the development of the subject property, or risk having the approval being nullified.
